

# Level 6 Diploma in Advanced Fire Safety Design and Building Risk Management

**ENDEAVOUR**  
TRAINING CENTRE

## Advance Your Career in Fire Safety with Endeavour Training

Delivered by Endeavour Training, part of the Endeavour Group, the ProQual Level 6 Diploma in Advanced Fire Safety Design and Building Risk Management is a nationally recognised, regulated qualification awarded through ProQual. Designed for experienced professionals operating at an advanced level, this programme develops competence in fire safety design, engineering principles, and building-wide risk management aligned to modern regulatory expectations.

Learners develop advanced capability in evaluating fire safety strategies, analysing complex building systems, and managing risk within higher-risk and complex buildings. The qualification supports progression into senior technical, engineering, and strategic roles within fire safety, building safety, and risk management sectors.

## Who the Course Is For

This course is designed for experienced fire safety professionals, fire engineers, and senior practitioners working within complex and higher-risk buildings. It is suited to those responsible for fire safety design, reviewing fire strategies, and managing building-wide fire risk within regulated environments.

## Career Progression & Professional Recognition

The Level 6 Diploma in Advanced Fire Safety Design and Building Risk Management is a nationally recognised, regulated qualification aligned to advanced practitioner-level competence. It supports progression into senior roles within fire safety design, fire engineering, and building safety management in higher-risk and complex environments. The qualification strengthens professional credibility and aligns with frameworks such as BS 8671 and the Building Safety Act, providing a pathway into strategic and technical roles within fire safety and risk management.

## Expert Tutor Support

Training and assessment are supported by experienced Fire Safety professionals with extensive real-world expertise. Learners benefit from practical guidance, professional insight, and ongoing support throughout the qualification.

## Structured Learning & Online Portal

Learners are supported through clear workbooks, guidance materials, and access to an online learner portal, providing a structured yet flexible route to completion. Evidence is gathered from real workplace activity, making learning immediately relevant.

## Flexible Distance Learning

This qualification is delivered via distance learning, allowing learners to study around work and personal commitments. With a 12-month access period, candidates can progress at a pace that suits them, typically completing within 8 -10 months.

## What you'll do on the course

### Lead Fire Safety Design and Strategy Development

Develop and produce fire safety strategies aligned with design intent, regulatory frameworks, and building safety requirements, including higher-risk buildings and complex design scenarios.

### Evaluate Building-Wide Fire Risk and Performance

Assess internal and external fire spread, system interactions, and building-wide risk using advanced analytical approaches, including performance-based and process safety principles

### Analyse External Wall and Façade Risk

Critically appraise external wall systems using risk-based methodologies aligned with PAS 9980, evaluating fire spread potential, construction, and mitigation strategies

### Apply Advanced Risk and Safety Case Principles

Use system-based risk management, barrier models, and safety case thinking to assess cumulative risk, justify decisions, and support building safety assurance.

## Why Choose Endeavour Training?

Because you want training that's credible, flexible, and built around real work, delivered by industry experts and backed by recognised accreditation.

### Why Choose Endeavour Training?

- ✓ Chartered expert-led training
- ✓ Ofqual-regulated ProQual qualifications
- ✓ ProQual Approved Centre (AC)
- ✓ Work-based, no exams
- ✓ Flexible distance learning
- ✓ Trusted since 2018
- ✓ Excellent learner feedback
